**110 Years (1901-2010) Monthly Rainfall Data Series for
Districts, States and Met Sub-divisions and All India
(All the rainfall values are in mm)**

1. All India Rainfall Series
2. Region wise Rainfall Series
3. Sub - division Rainfall Series
4. State Rainfall Series
5. District Rainfall Series
6. Mean, Standard Deviation and Coefficient of Variation***
 - a. All India Rainfall Series
 - b. Region wise Rainfall Series
 - c. Sub-division Rainfall Series
 - d. State Rainfall Series
 - e. District Rainfall Series

***** Based on the period 1901 - 2000**

About this CD-ROM

This CD-ROM contains actual monthly, annual and seasonal rainfall series for 110 years (1901 – 2010) along with their mean, standard deviation and coefficient of variation values for 100 years (1901 – 2000) of all India, Four Homogeneous Regions, Met Sub-divisions, States and Districts.

This CD-ROM is basically designed for the use in personal computers with the Window Operating System. This CD-ROM will automatically open with the AUTORUN facility. The data are in a tabular form as simple text (ASCII). The data sheet can be printed for your use. The data sheet can be exported to EXCEL spread sheet or as a MS Word file. **If AUTORUN facility does not work, the CD-ROM data can be accessed through Microsoft Explorer by opening the e-book file.**

METHODOLOGY USED IN THE PREPARATION OF DISTRICTS, STATES, SUBDIVISIONS AND ALL INDIA MONTHLY RAINFALL SERIES :

- a. **Monthly Rainfall** : It is the sum of daily rainfall considering all the days in a month. If rainfall data of even a single day in the month is missing, the monthly rainfall data of that whole month is not considered and is left blank.
- b. **District series** : It is calculated by taking simple arithmetic mean of the monthly rainfall data of all the available stations in the district for a particular month.
- c. **Subdivision series & State series** : It is calculated by district area weighted method.
- d. **All India series** : It is calculated by subdivision area weighted method.
- e. **All rainfall values are in mm**

NOTE 1 : The data in excel format is also available in this CD-ROM.

2 : All the District / State / Sub-division data series is computed based on recent geographical bifurcation.

3 : The following notations are used in this CD – ROM

- JF** - January + February (Winter Season)
- MAM** - March + April + May (Pre Monsoon Season)
- JJAS** - June + July + August + September (Monsoon Season)
- OND** - October + November + December (Post Monsoon Season)
